PROGRAM #: OP101 - OPERABLE PARTITIONS

Length: 1 hour - Credits: 1 LU Hour - HSW: No

Description: Overview of the basics of interior space division through the use of operable partitions.

PROGRAM #: OP202 - OPERABLE WALL SYSTEMS

Length: 1 hour - Credits: 1 LU Hour - HSW: NO - Sustainable: YES

Description: This program goes beyond the basics of operable partitions addressing layout, operating clearances, panel construction, and acoustical elements. The intent of this program is to address how these elements work together and impact the environment in terms of health, safety, and welfare.

Takeaways:

1. After completing this program, participants will understand the various panel characteristics and configurations available for operable wall systems.
2. The different suspension systems available for use.
3. The various types of acoustical seals and how they contribute to desired STC levels.
4. Health and safety as it relates to the moving and fire ratings of operable partitions.

PROVIDER: MODERNFOLD, INC. - PROVIDER NUMBER: H128

PROGRAM #: OPG333 - MOVABLE GLASS PARTITION SYSTEMS

Length: 1 hour - Credits: 1 LU Hour - HSW: NO - Sustainable: YES

Description: This program explores the use of Movable Glass Partition Systems to facilitate space management. The program addresses the benefits and features of the various types of glass partitions including panel construction and acoustical contributions as well as the impact on the environment and the contribution to green initiatives afforded with movable glass partitions.

Takeaways:

1. After completing this program, participants will understand the various panel characteristics and configurations available for operable wall systems.
2. The different suspension systems available for use.
3. The various types of acoustical seals and how they contribute to desired STC levels.
4. Health and safety as it relates to the moving and fire ratings of operable partitions.

PROVIDER: MODERNFOLD, INC. - PROVIDER NUMBER: H128

PROGRAM #: SKY 0003 - ACOUSTIC SEPARATION USING MOTOR DRIVEN OPERABLE PARTITIONS

Length: 1 hour - Credits: 1 LU - HSW: YES - IDCEC: YES

Description: The objective of this course is to provide design professionals with a thorough understanding of the available motorized acoustically rated movable partitions used in interior applications. (traditional, vertical stacking and vertical folding)

PROGRAM #: SKY 0004 - FLEXIBLE SPACE DESIGN TRENDS

Length: 1 hour - Credits: 1 LU Hour - HSW: NO - Sustainable: YES

Description: To explore space utilization trends and challenges in three major areas - corporate, hospitality, and education. Also to understand acoustics and acoustical control in those spaces and to investigate how space flexibility can impact design

Takeaways:

1. Explore space utilization trends and challenges
2. Explore what space flexibility really means
3. Understand overall acoustics and acoustical ratings and how they are tested
4. Understand the importance of acoustical control in all types of spaces

PROVIDER: SKYFOLD - PROVIDER NUMBER: J756-05

KLEIN[®]

PROGRAM #: K102 THE BEAUTY OF INTERIOR SLIDING GLASS DOORS

Length: 1 hour - Credits: 1 LU – IDCEC: YES

Description: Will cover the latest in interior sliding glass door technology in terms of applications, design options, product features and contribution to green design.

Takeaways:

1. Understand the latest technologies and offerings in interior sliding glass doors and partitions
2. Understand the various glass options and their benefits in sliding glass doors and partitions
3. Identify the relationship with interior glass doors and green design and how its contribution to LEED points
4. Explain how interior glass can increase human productivity and well-being while reducing energy consumption

PROVIDER: KLEIN - PROVIDER NUMBER: #40107511
