

PROGRAM #: EWAIACES09- CONTINUOUS DESIGN USES FOR LARGE OPENING GLASS WALL SYSTEMS

Length: 1 hour - Credits: 1 AIA HSW CE: HSW: YES - Sustainable: YES

Description: This course is designed to provide architects with an understanding of the definitions, continuous capabilities, and advantages of large moveable glass wall systems. It explains the importance of form and function in design, exhibits innovative project ideas, and depicts how glass wall systems can improve an occupant's safety and health.

Takeaways:

By completing this course, the design professional will be able to:

1. Inform others of the capabilities, usages, and definitions of large moveable glass wall systems.
2. Exhibit innovative and new ideas for commercial & residential project design processes.
3. Depict how large glass walls can be an important part of form and function in sustainable design.
4. Deliver answers for how operable glass wall systems can improve an occupant's safety and health.
