

## PROGRAM #: RAYDOOR-1003 - DESIGNING FLEXIBLE INTERIORS WITH SLIDING DOORS & MOVABLE WALLS

**Length:** 1 hour - Credits: 1 AIA HSW CE; HSW: YES

**Description:** This course will demonstrate how architects, designers and contractors can plan for and utilize sliding systems to add dynamic functionality to their projects. Health, safety and wellness can be addressed by using sliding doors - bringing light deeper into spaces and creating areas of privacy where needed.

**Takeaways:**

By completing this course, the design professional will be able to:

1. Boost health, safety and wellness of an interior space.
2. Understand and maximize the functional possibilities of both sliding doors and operable walls.
3. Identify diverse typologies: Selecting the proper system for specific spatial requirements..
4. Offer a breadth of material and design choices.
5. Maximize the budget considerations when specifying sliding doors and operable walls.
